

Enhancing Lotus Domino® search

Best of breed support for Lotus Domino

Enhanced Search for Lotus Domino

Efficiency and productivity - effective information location

Find it. Act on it. Finding the information you need rapidly and intuitively from across the Lotus and Domino domain.

Maximise daily performance by reducing the time taken by each individual to locate and access the information they require from the Lotus environment (and potentially across the enterprise).

Search for, navigate, access, analyse, understand, use and communicate information, quickly, efficiently, securely and effectively.

Gain more pertinent results to your searches in Lotus and Domino.

Enable staff to compile all the pertinent information they need with one search

Best of breed support for advanced search with Lotus Domino environments. A cost-effective foundation for federated enterprise search with powerful capability and excellent ease of use.

The screenshot displays the Lotus Domino search interface. At the top, there's a search bar with the query 'Hala for every event'. Below the search bar, there are navigation tabs for 'Basic Search', 'Advanced Search', and 'Category Tree'. The search results are displayed in a list format, showing document titles, dates, and relevance scores. A 'Top Results Charts' section is visible, featuring two dynamic field charts. The first chart shows 'Field name: categories' with a bar chart for 'Security (7)'. The second chart shows 'Field name: databaseid' with a bar chart for 'Lotus Domino A. (488)'. To the right of the search results, there is a 'List of Trademarks' section with various links and help icons.

- ✓ Basic and Advanced Search
- ✓ Category Tree for Search-n-Browse
- ✓ Top Results Analysis
- ✓ Spell Checker and Synonyms
- ✓ Concept / Semantic Search
- ✓ Dynamic Summaries
- ✓ Featured Links

Enhanced search provides full text search on document contents on all (or selected) Domino databases (including e-mail if required).

The set of documents to crawl can be specified using a Notes formula. This gives the Lotus administrator fine grained control over which documents are searched.

Notes formula to limit the data to crawl:

(for example, `SELECT @IsAvailable(Year) & Year > 2003`)

Getting started is easy with pre-built Lotus Domino crawlers:

- Lotus Notes/Domino 5.x, 6.0.x, 6.5.x, 7.x, 8.x
- Lotus Quickr for Domino 8.0*, QuickPlace 6.5.x, 7.x
- Domino Document Manager 6.5.x, 7.x

(*) Lotus Quickr for Portal 8.0 is also supported

Additional features support ongoing ease of use and minimized maintenance:

- Native document-level security
- ACL indexing and real-time verification
- Uses native Domino interfaces (NRPC or DIOP)
- Plug-in for Lotus Notes v8.x client
- Support for Domino on Windows, Linux, and iSeries

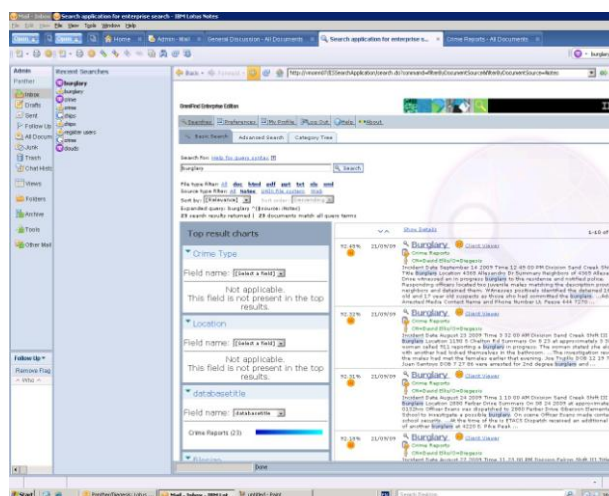

Enhanced search honours the security model and access controls of the underlying repositories and documents.

Using IBM OmniFind Enterprise Edition combined with installation and configuration services from Diegesis the enhanced search capabilities are delivered within the user's familiar Notes environment.

Once the Notes client extension is installed, OmniFind Search is made available as another option within the standard Notes desktop search bar:

Search results are displayed within the Notes client using the OmniFind search portal:

Clicking on a result to open the document (using the Client Viewer option) opens the document directly in a new Notes client window:

Quick, easy and powerful the enhanced search capability supports users in finding the pertinent information from across the Lotus Domino domain – enhancing daily productivity and user satisfaction.

For more information on enhancing Lotus Domino search and to find out how quickly you can enhance the productivity and user experience for your Lotus users give us a call on 0208 286 7587 and ask for either David or Nick.

If you are considering enterprise search across all your systems including databases, document management systems, file servers and Notes/Domino then call us to discuss how the powerful search capabilities noted above can be deployed across enterprise systems for a powerful, consolidated search experience.

About Diegesis

Diegesis provide consultancy, IT services, systems-integration and software to deliver 'business performance improvements'. Key areas of expertise include: enterprise search & knowledge discovery solutions, systems integration, and business insight/intelligence solutions.

Diegesis can work with you on strategic objectives such as the 'Business Performance Framework' and 'information architecture' required to enable flexible and dynamic business improvements today and for the future, or provide you with niche solutions to specific challenges.

The **Diegesis** team has significant experience in 'business technology' and information technology; from needs analysis to cost/benefit analysis; from solution framework architectures to solution design; from software development to software package implementation; from systems integration to user training and support. We have particular experience in information management (including data and document/content management), data & document archiving, enterprise search & knowledge management, portals, systems integration, and risk management systems. We prefer to deliver within an overall service oriented architecture, however we can deliver niche solutions if required.

Diegesis takes a phased approach to projects of significant customer value so that you are able to assess performance and value-for-money along the way. **Diegesis** focus on the business objectives and balance this with your Return on Investment (RoI), Cost/benefit and Total Cost of Ownership (TCO) requirements as well as your overall appetite for risk.

We deliver solutions which have practical applications to your business needs. We provide up front consulting where appropriate as a basis for ensuring everyone is clear of the business objectives and critical success

factors. Any consulting is always focused on the end objective of delivering a practical solution to a business issue.

For more information contact Nick or David at sales@diegesis.co.uk
